

Job Title: Technical Manager - Wet Lab

Company Overview

We are an NABL accredited food testing laboratory located in Kerala. With a commitment to providing accurate and reliable results, we specialize in food and water analysis. As part of our expansion, we are currently seeking an experienced Chemist to join our team as a Technical Manager for the Wet Lab.

Position Requirements

- Minimum Qualification: M.Sc. Chemistry
- Additional Preference given to candidates with any of the following:
 - NABL Authorized Signatory
 - FSSAI qualified Food Analyst
 - Experience in a food testing lab

Job Description

Overall Responsibilities

As the Technical Manager, you will have the overall responsibility for all technical operations within the chemical laboratory. You will work closely with our team to ensure the highest standards of quality and accuracy in our testing procedures.

Specific Duties and Responsibilities

- Supervise testing and other technical operations for food and water analysis.
- Ensure that standard test methods are followed and define internal calibration procedures.
- Validate test methods and review standard test methods and calibration procedures.
- Collaborate on calibration of measuring instruments requiring calibration, validation, and record keeping.
- Estimate measurement uncertainty of tests conducted in the lab.
- Identify training needs within the team, provide training, and evaluate the effectiveness of training programs.
- Offer cooperation to customers by clarifying technical doubts and providing opinions and interpretations based on test methods and results.
- Verify and approve test results and partial reports through LIMS (Laboratory Information Management System).
- Vetting and signing of test reports.
- Ensure completion of tests and issuance of test reports within agreed time schedules as per client contracts.
- Participate in IQC (Internal Quality Control), ILC (Inter-Laboratory Comparison), and PT (Proficiency Testing) programs.

If you possess the required qualifications, experience, and skills, we encourage you to apply for this position. Join our team and contribute to our mission of ensuring food safety and quality through reliable and accurate testing.
